#F8F6F3 - Light shades

Use this color as the background for your dark-on-light designs, or the text color of an inverted design.

#76C4E2 - Light accent

Accent colors can be used to bring attention to design elements by contrasting with the rest of the palette.

#1F8FED - Main brand color

This color should be eye-catching but not harsh. It can be liberally applied to your layout as its main identity.

#8A7992 - Dark accent

Another accent color to consider. Not all colors have to be used - sometimes a simple color scheme works best.
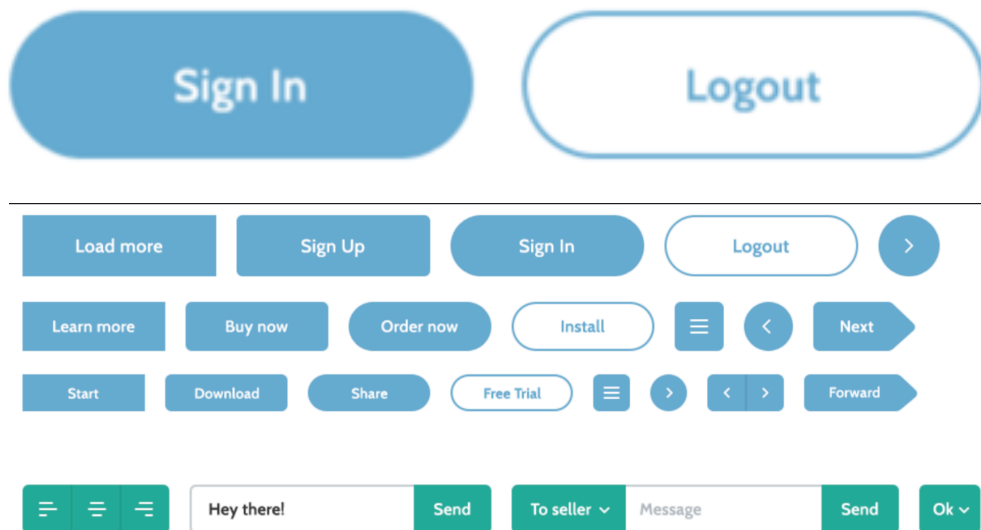

#1F294C - Dark shades

Use as the text color for dark-on-light designs, or as the background for inverted designs.
